

EnLink Midstream Appoints Christopher H. Tennant to Senior Vice President - Commercial

10.21.15

DALLAS--(BUSINESS WIRE)-- EnLink Midstream, LLC (NYSE: ENLC) (the General Partner) and EnLink Midstream Partners, LP (NYSE: ENLK) (the Master Limited Partnership) today named Christopher H. Tennant to the position of Senior Vice President - Commercial. In his new role, Tennant will assume responsibility for the commercial functions of the NGL and crude oil teams.

"Chris is a proven leader and has been instrumental in the growth of our NGL business," said Barry E. Davis, EnLink Midstream's President and Chief Executive Officer. "Chris' experience with NGLs, crude oil, trucking, and rail capabilities make him a natural fit for this position. I am confident that by combining the efforts of our NGL and crude oil teams, we will continue to see opportunities for synergies and growth across the organization."

Tennant has over 20 years of experience in the energy industry. Prior to joining EnLink's predecessor in 2010, he worked for Chevron Products as team leader of global supply and trading, where he managed domestic U.S. production, the development of commercial strategies, and global trading plans. Before that, he worked at Dynegy as regional manager of NGLs for the southwest and western United States. In both roles, Tennant also managed the commercial responsibilities for the company-owned truck and rail fleets.

About the EnLink Midstream Companies

EnLink Midstream is a leading, integrated midstream company with a diverse geographic footprint and a strong financial foundation, delivering tailored customer solutions for sustainable growth. EnLink Midstream is publicly traded through two entities: EnLink Midstream, LLC (NYSE: ENLC), the publicly traded general partner entity, and EnLink Midstream Partners, LP (NYSE: ENLK), the master limited partnership.

EnLink Midstream's assets are located in many of North America's premier oil and gas regions, including the Barnett Shale, Permian Basin, Cana-Woodford Shale, Arkoma-Woodford Shale, Eagle Ford Shale, Haynesville Shale, Gulf Coast region, Utica Shale and Marcellus Shale. Based in Dallas, Texas, EnLink Midstream's assets include over 9,200 miles of gathering and transportation pipelines, 17 processing plants with 3.6 billion cubic feet per day of processing capacity, seven fractionators with 280,000 barrels per day of fractionation capacity, as well as barge and rail terminals, product storage facilities, purchase and marketing capabilities, brine disposal wells, an extensive crude oil trucking fleet and equity investments in certain private midstream companies.
